District School Board of Seminole County
400 E. Lake Mary Blvd.
Sanford, FL 32773-7127

Dear Chairman, School Board Members, and Citizens of Seminole County:

State law requires that all local governments publish, after the close of each fiscal year, a complete set of financial statements presented in conformity with accounting principles generally accepted in the United States of America (GAAP), and audited in accordance with governmental auditing standards generally accepted in the United States of America. Pursuant to this requirement, we hereby issue the Comprehensive Annual Financial Report (CAFR) of the District School Board of Seminole County, Florida (District) for the fiscal year ended June 30, 2014.

The accompanying report includes all funds of the District, The Seminole School Board Leasing Corporation, Inc. (Leasing Corporation), The Foundation for Seminole County Public Schools, Inc. (Foundation) and the District's three charter schools, Choices in Learning, Inc., Galileo School for Gifted Learning and UCP Seminole Charter School (Charter Schools). The Leasing Corporation was formed by the School Board to be the lessor in connection with financing the acquisition and/or construction of certain educational facilities and is considered to be a blended component unit. The Foundation is a not-for-profit corporation organized and operated as a direct-support organization under Section 1001.453, Florida Statutes, to raise funds; receive, hold, invest, and administer property; and to make expenditures for the benefit of the District. The Charter Schools are separate not-for-profit corporations organized pursuant to Chapter 617, Florida Statutes, the Florida Not-For-Profit Corporation Act, and Section 1002.33, Florida Statutes. The Foundation and the Charter Schools are included in aggregate as discretely presented component units.

This report consists of management's representations concerning the finances of the District. Consequently, management assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making these representations, management of the District has established a comprehensive internal control framework that is designed both to protect the District's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the District's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the District's comprehensive framework of internal controls has been designed to

provide reasonable, rather than absolute, assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The Florida Auditor General has audited the District's financial statements. The goal of the independent audit is to provide reasonable assurance that the financial statements of the District for the fiscal year ended June 30, 2014, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded that there was a reasonable basis for rendering an unmodified opinion that the District's basic financial statements for the fiscal year ended June 30, 2014, are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

The independent audit of the financial statements of the District was part of a broader, federally mandated "Single Audit" designed to meet the special needs of federal grantor agencies. The District is required to undergo an annual single audit in conformity with the provisions of the Single Audit Act of 1996 and the United States Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*. The standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements, with special emphasis on internal controls and legal requirements involving the administration of federal awards. Information related to this single audit, including the schedule of expenditures of federal awards, findings and questioned costs, summary of prior audit findings, and the independent auditor's reports on the system of internal control and on compliance with applicable requirements, are included in the single audit section.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the independent auditor's report.

Profile of the District

The District and its governing board were created pursuant to Article IX, Section 4 of the Constitution of the State of Florida. The District is an independent taxing and reporting entity managed, controlled, operated, administered, and supervised by District school officials in accordance with Chapter 1001, Florida Statutes. The Board consists of five elected officials responsible for the adoption of policies, which govern the operation of District public schools. The appointed Superintendent of Schools (Superintendent) is the executive officer of the Board and is responsible for the administration and management of the schools within the applicable parameters of Florida Statutes, State Board of Education Rules, and School Board policies. The Superintendent is also specifically delegated the responsibility of maintaining a uniform system of records and accounts in the District by State Board of Education Rule 6A-1.001, Florida Administrative Code.

The geographic boundaries of the District are those of Seminole County. During the 2013-14 fiscal year, the District operated 60 K-12 schools, including 36 elementary schools, 12 middle schools, 9 high schools, and 3 specialty schools. In addition, the District sponsors 3 charter schools that are component units of the District. In the 2013-14 fiscal year, the District provided general, special, vocational, and other educational programs to 64,019 unweighted full-time equivalent students. The projected enrollment for the 2014-15 fiscal year is 63,877 unweighted full-time equivalent students. Florida Inventory of School Houses (FISH) has the average age of the District's schools at 23 years old.

The District receives the majority of its operating funds through a State funding formula that is intended to equalize funding received from the State and local property tax between districts within the State. Charter schools operating through a contract with the District are provided with their proportionate share of these funds, based upon the number of full-time equivalent students enrolled at the charter school.

Economic Condition and Outlook

Seminole County is part of the Orlando Metropolitan Statistical Area (MSA) along with Orange, Osceola and Lake Counties. According to the 2013 Metro Orlando Economic Development Commission (the Commission), Metro Orlando currently has a population of 2.2 million people and is projected to be 2.7 million in 2018. The Commission also promotes Seminole County as being a hotbed for high tech and other "upscale" industry growth directly on the "I-4 corridor" (an area that roughly runs from St. Petersburg and Tampa through Lakeland, Orlando, Lake Mary, Sanford, and ends in Daytona Beach).

The population of Seminole County increased 15.8 percent (57,522) from 2000 to 2010 and is projected to reach 465,351 by 2020. The 2010 U.S. Census places the 65 and older age group of Seminole County's population at 12.0 percent which differs significantly from the State of Florida at 17.3 percent, and from the nation at 13.0 percent.

With a business climate that has fostered quality development, the County has become home to a plethora of dynamic corporations. Economic growth in the County has taken several forms. Most notable of which is the establishment of corporate headquarters for organizations such as the American Automobile Association (AAA), Axium Healthcare Pharmacy, Mitsubishi Power Systems, Remington Administrative Services, Scholastic Book Fairs, Sears Home Improvement Products, and The Newport Group, as well as the emergence of many high tech companies, including Convergys, Faro Technologies, NCR, SAP, SunGard Public Sector, Symantec and Team Cymru. Financial service companies providing back office services, software development, insurance and mortgage services have also clustered along the I-4 corridor including Chase Card Services, BNY Mellon, Fiserv, Harland, Pershing, The Hartford, Universal American Financial and Verizon. With its on-going expansion and related road improvements, coupled with the State's largest foreign trade zone designation, the Orlando Sanford International Airport is a targeted area for development and a center for international travel, trade and investment.

The District recognizes that the continued enhancement of the local economy is of mutual benefit to both the District and the County and that an excellent system of public education is a significant factor in attracting new business and industry to the County. The District remains Seminole County's largest employer, employing 6,723 full and part-time employees paid from the general fund, which includes 4,376 classroom teachers.

Long-Term Financial Planning

The District follows procedures required by Florida Statutes and the State Board of Education rules in establishing and adopting annual budgets for each of the governmental fund types. Budgets are prepared using the same modified accrual basis as is used to account for governmental funds. Appropriations are controlled at the object level (e.g. salaries, benefits, and purchased services) within each function activity (e.g. instruction, student personnel services, and school administration) and may be amended by resolution at any Board meeting prior to the due date for the annual financial report.

At June 30, 2014, unassigned fund balance in the general fund totaled \$26,251,129 or 5.7 percent of total general fund expenditures. This exceeds the District policy of 4 percent of recurring expenditures. During the initial planning for the budget, the District each year sets aside 4 percent of its revenues in order to promote compliance with this policy.

On June 26, 2012, the Board approved a resolution providing for a referendum election to determine if the electors of the school district authorize the Board, as allowed under Section 1011.73, Florida Statutes, to annually levy up to one mill for not more than four years for essential operating expenses. This referendum was approved as part of the November 6, 2012 general election. This millage was first assessed for the fiscal year ended June 30, 2014.

Major Initiatives

Class Size Reduction Amendment

In November 2002, the voters of Florida amended the State Constitution to limit class size. The amendment established the maximum number of students in core-curricula courses assigned to a teacher in each of the following three grade groupings: (1) pre-kindergarten through grade 3, 18 students; (2) grades 4 through 8, 22 students; and (3) grades 9 through 12, 25 students. Based on the annual review for the 2013-14 fiscal year conducted by the Florida Department of Education, the District complied with constitutional maximums at all schools and classrooms.

Capital Outlay Program

In recent years, the District has had a drastic reduction in the availability of funds for capital projects. The average funding for capital projects from sources other than sales tax for fiscal years 2005 through 2009 was \$73 million per year (sales tax was an average of \$17 million per year during this timeframe). The average funding for capital projects from sources other than sales tax for fiscal years 2010 through 2014 was \$44 million per year (sales tax was an average of \$1 million per year during this timeframe). The decrease of \$29 million per year on average for non-sales tax capital funding is due to a decrease in property values and a change in the maximum available millage for levy for capital needs allowable by State law. The decrease in sales tax funding was due to expiration of an old sales surtax and agreement with the Board of County Commissioners of Seminole County.

On March 11, 2014, the District entered into an agreement with the Board of County Commissioners of Seminole County to share a proposed one percent local government infrastructure sales surtax as allowed under Section 212.055(2), Florida Statutes. The agreement provides the District with 25 percent of the proposed sales surtax subject to a countywide referendum election. This referendum was approved during the May 20, 2014 special election. The District is estimated to receive \$159 million over a ten year period from the sales surtax interlocal agreement.

Accomplishments

One of the ways to judge a school district is to compare the results of its students on national and statewide testing and the accomplishments of its staff. The District believes that its students and staff have performed remarkably well based on various tests and accomplishments as noted below.

Schools throughout Florida are held accountable and receive school grades based on the results of the Florida Comprehensive Assessment Test (FCAT). The 2013-14 fiscal year marks the 15th year of this accountability program and Seminole County Public Schools (SCPS) continued its tradition of excellence. SCPS is rated as an "A" district by the Florida Department of Education. SCPS was one of only 10 Florida public school districts to receive a grade of "A" and was the largest Florida school district to achieve that feat.

All SCPS High Schools ranked in the top 4 percent of the nation by Newsweek Magazine based on the number of Advanced Placement and International Baccalaureate tests taken.

SCPS has one of the State's highest graduation rates and the highest college ready rates in Central Florida. SCPS is ranked first in the 17 largest districts in Florida for FCAT Reading, Mathematics, and Science and ranked fourth in Writing.

Over 80 percent of Seminole County's schools have historically received a grade of 'A' or 'B'. This continued this year with 81 percent receiving either a grade of 'A' or 'B'. Excluding the 3 specialty schools that do not receive a grade, this fiscal year 28 schools received a grade of 'A', 12 received a grade of 'B', 3 received a grade of 'C', 4 received a grade of 'D', and 1 received a grade of 'F'. Due to the change in the method of rating, none of the 9 high schools has been rated as of this date for 2013-14 fiscal year. For the 2012-13 fiscal year, 7 high schools received a grade of 'A' and 2 received a grade of 'B'.

More than 53 percent of SCPS teachers have earned Master's degrees or higher.

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting and the Association of School Business Officials International (ASBO) awarded a Certificate of Excellence in Financial Reporting to the District for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2013. This was the 13th year the District has received these prestigious awards. In order to be awarded the Certificate of Achievement for Excellence in Financial Reporting and the Certificate of Excellence in Financial Reporting, the District must publish an easily readable and efficiently organized CAFR.

The Certificate of Achievement and Certificate of Excellence are valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement and the Certificate of Excellence program requirements and we are submitting it to the GFOA and ASBO to determine its eligibility for another certificate. This report also satisfied both GAAP and applicable legal requirements.

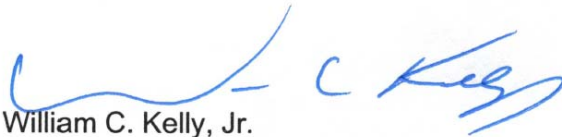

The preparation and completion of this Report on a timely basis was made possible by the dedicated service of the entire staff of the Finance department and in coordination with the audit staff of the Florida Auditor General. Each member of the department and the audit staff has our sincere appreciation for the contributions made in the preparation and completion of this report.

In closing, we would like to thank the members of the School Board for their leadership and support in planning and conducting the financial operations of the District.

Respectfully submitted,

Walt Griffin, Ed.D.

INDEPENDENT AUDITOR'S REPORT

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the Seminole County District School Board, as of and for the fiscal year ended June 30, 2014, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the school internal funds, which represent 11 percent of the assets and 32 percent of the liabilities of the aggregate remaining fund information. In addition, we did not audit the financial statements of the aggregate discretely presented component units, which represent 100 percent of the transactions and account balances of the aggregate discretely presented component units' columns. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinions, insofar as they relate to the amounts included for the school internal funds and the aggregate discretely presented component units, are based solely on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information for the Seminole County District School Board as of June 30, 2014, and the respective changes in financial position and, where applicable, cash flows thereof and the budgetary comparisons for the general fund and major special revenue fund for the fiscal year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in note II to the financial statements, the District has determined prior period adjustments were required to restate the applicable fund balances and net position of the general fund, nonmajor governmental funds, internal service funds, and governmental activities. As also discussed in note II to the basic financial statements, the District has elected to change its method of accounting for compensated absences liabilities for the 2013-14 fiscal year from the vesting method to the termination method. In addition, as discussed in note II to the financial statements, the District included four component units in the financial statements for the 2013-14 fiscal year that were excluded from the financial statements for the 2012-13 fiscal year.

These matters affect the comparability of amounts reported for the 2013-14 fiscal year with amounts reported for the 2012-13 fiscal year. Our opinion is not modified with respect to these matters.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that **MANAGEMENT'S DISCUSSION AND ANALYSIS** and **SCHEDULE OF FUNDING PROGRESS - OTHER POSTEMPLOYMENT BENEFITS PLAN**, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a required part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial

statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The other supplementary information – general fund, combining and individual fund financial statements and schedules, and the introductory and statistical sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. Also, the accompanying **SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS** is presented for purposes of additional analysis as required by the United States Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the basic financial statements.

The other supplementary information – general fund, combining and individual fund financial statements and schedules, and **SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS**, are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, other supplementary information – general fund, the combining and individual fund financial statements and schedules, and **SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS**, are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued a report on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, rules, regulations, contracts, and grant agreements and other matters included under the heading **INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF THE FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS**.

The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Respectfully submitted,

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the District School Board of Seminole County, Florida, (District), we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the fiscal year ended June 30, 2014. The information contained in Management's Discussion and Analysis (MD&A) is intended to highlight significant transactions, events, and conditions and should be considered in conjunction with the District's financial statements and notes to financial statements found immediately following the MD&A.

FINANCIAL HIGHLIGHTS

Key financial highlights for the 2013-14 fiscal year are as follows:

- The assets of the District exceeded its liabilities at June 30, 2014, by \$558,360,130 (net position). Of this amount, \$14,261,481 represents unrestricted net position which may be used to meet the District's ongoing obligations to citizens and creditors.
- The District's total net position decreased during the current fiscal year by \$3,521,441 (or 0.6 percent), excluding \$5,695,944 in adjustments made to increase beginning net position. The adjustments to beginning net position are explained further in note II to the financial statements.
- General revenues totaled \$527,909,321, or 92.5 percent of all revenues. Program specific revenues in the form of charges for services, operating grants and contributions, and capital grants and contributions totaled \$42,547,148, or 7.5 percent of all revenues.
- At June 30, 2014, the fund balance for the General Fund totaled \$44,563,883. The amount represents an \$83,966 decrease during the current fiscal year, excluding \$2,525,941 in adjustments made to decrease beginning fund balance. The adjustments to beginning fund balance are explained further in note II to the financial statements. The total of General Fund assigned and unassigned fund balances was \$40,833,297, or approximately 8.9 percent of General Fund expenditures.
- The District's total Bonds Payable and Certificates of Participation debt decreased by \$15,919,220 or 7.7 percent during the current fiscal year.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The basic financial statements consist of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the basic financial statements. This report also includes supplementary information intended to furnish additional detail to support the basic financial statements themselves.

Government-wide Financial Statements

The government-wide financial statements provide both short-term and long-term information about the District's overall financial condition in a manner similar to those of a private-sector business. The statements include a statement of net position and a statement of activities that are designed to provide consolidated financial information about the governmental and business-type activities of the District presented on the accrual basis of accounting.

The statement of net position provides information about the District's financial position, its assets, liabilities, and deferred inflows/outflows of resources, using an economic resources measurement focus. Assets plus deferred outflows of resources, less liabilities and deferred inflows of resources, equals net position, which is a measure of the District's financial health. The statement of activities presents information about the change in the District's net position, the results of operations, during the fiscal year. An increase or decrease in net position is an indication of whether the District's financial health is improving or deteriorating.

The government-wide statements present the District's activities in the following categories:

- **Governmental activities** – This represents most of the District's services, including its educational programs: basic, vocational, and exceptional education. Support functions such as transportation, food service, and administration are also included. Local property taxes and the State's education finance program provide most of the resources that support these activities.
- **Business-type activities** – The District charges fees to cover the cost of certain services it provides. The District's only business-type activity is the Extended Day Program.
- **Component units** – The District presents five separate legal entities in this report. The District's three charter schools (Choices in Learning, Inc., Galileo School for Gifted Learning and UCP Seminole Charter School) and The Foundation for Seminole County Public Schools, Inc. are legally separate organizations and component units that are included in this report because they meet the criteria for inclusion provided by generally accepted accounting principles. Financial information for these component units is reported separately from the financial information presented for the primary government. The Seminole School Board Leasing Corporation, Inc. (Leasing Corporation), although also a legally separate entity, was formed to facilitate financing for the acquisition of facilities and equipment for the District. Due to the substantive economic relationship between the District and the Leasing Corporation, the Leasing Corporation has been included as an integral part of the primary government.

Fund Financial Statements

Fund financial statements are one of the components of the basic financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements and prudent fiscal management. Certain funds are established by law while others are created by legal agreements, such as bond covenants. Fund financial statements provide more detailed information about the District's financial activities, focusing on its most significant or "major" funds rather than fund types. This is in contrast to the entity wide perspective contained in the government-wide statements. All of the District's funds may be classified within one of the broad categories discussed below.

Governmental Funds

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in assessing a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental funds balance sheet and the governmental funds statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The governmental funds balance sheet and statement of revenues, expenditures, and changes in fund balances provide detailed information about the District's most significant funds. The District's major funds are the General Fund, Federal Economic Stimulus Program Special Revenue Fund, Certificates of Participation Debt Service Fund, and §1011.71(2) Local Capital Improvement Tax Capital Projects Fund. Data from the other governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements in this report, immediately following the notes to the financial statements and required supplementary information.

The District annually adopts a budget for its governmental funds. Budgetary comparison statements have been provided as part of the basic financial statements for the General Fund and Federal Economic Stimulus Program Special Revenue Fund to demonstrate compliance with the budget at the function level. Budgetary comparison schedules for all the remaining funds are provided immediately following the notes to the financial statements and required supplementary information.

Proprietary Funds

Proprietary funds may be established to account for activities in which a fee is charged for services. Two types of proprietary funds are maintained:

- Enterprise funds are used to report the same functions as business-type activities in the government-wide financial statements. The District's only enterprise fund accounts for the Extended Day Program.
- Internal service funds are used to report activities that provide goods and services to support the District's other programs and functions through user charges. The District uses internal service funds to account for its self-insurance programs, print shop, and computer store. Since these services predominantly benefit governmental rather than business-type functions, the internal service funds have been included within the governmental activities in the government-wide financial statements. Individual fund data for each of these internal service funds is provided in the form of combining statements in this report, immediately following the notes to the financial statements and required supplementary information.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail, for those enterprise funds determined to be major. The District's only enterprise fund, for the Extended Day Program, is presented as a separate major fund. Conversely, the internal service funds are combined into a single, aggregated column in the proprietary fund financial statements.

Fiduciary Funds

Fiduciary funds are used to report assets held in a trustee or fiduciary capacity for the benefit of external parties, such as student activity funds. Fiduciary funds are not reflected in the government-wide statements because the resources are not available to support the District's own programs. In its fiduciary capacity, the District is responsible for ensuring that the assets reported in these funds are used only for their intended purposes.

The District uses agency funds to account for resources held for student activities and employee benefits programs.

Notes to the Financial Statements

The notes provide additional information that is essential for a full understanding of the data provided in the government-wide and fund financial statements.

Required Supplementary Information Other than MD&A

In addition to the basic financial statements and accompanying notes, this report also presents required supplementary information concerning the District's progress in funding its obligation to provide other postemployment benefits (OPEB) to its employees.

Combining and Individual Fund Statements and Schedules

The combining statements and additional budgetary comparison schedules referred to earlier in connection with non-major governmental funds and internal service funds are presented immediately following the Required Supplementary Information Other than MD&A.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. The following is a summary of the District's net position as of June 30, 2014, compared to net position as of June 30, 2013:

(*) Balances for June 30, 2013 have not been restated for adjustments to beginning net position in the fiscal year ended June 30, 2014. See note II to the financial statements regarding current year adjustments to beginning net position.

The largest portion of the District's net position, \$505,129,456 (90.5 percent) is net investment in capital assets (e.g., land; construction in progress; buildings and fixed equipment; improvements other than buildings; furniture, fixtures and equipment; motor vehicles; audio-visual materials; and computer software), less any related debt used to acquire those assets that is still outstanding. The District uses these capital assets to provide services to students; consequently, these assets are not available for future spending. Although the net investment in capital assets is reported net of related debt, the resources used to repay the debt must be provided from other sources, since the capital assets cannot be used to liquidate these liabilities.

The restricted portion of the District's net position, \$38,969,193 (7.0 percent), represents resources that are subject to external restrictions on how they may be used. The unrestricted net position, \$14,261,481 (2.5 percent), may be used to meet the District's ongoing obligations to students, employees, and creditors.

At the end of the current fiscal year, the District is able to report positive balances in all reported categories of net position for the government as a whole, and for its separate governmental and business-type activities. Positive balances were similarly reported for the prior fiscal year.

Overall, the current period results of operations decreased the District's net position versus the prior fiscal year by \$3,521,441. This was composed of a decrease in net position for governmental activities of \$3,528,710 that was offset by a small increase in business-type activities of \$7,269.

The key elements of the changes in the District's net position for the fiscal years ended June 30, 2014, and June 30, 2013, are as follows:

The largest revenue source for the District is from the State of Florida, Florida Education Finance Program (FEFP) which is presented as part of other unrestricted sources. FEFP revenue is based on a formula that utilizes student enrollment data, and is designed to maintain equity in funding across all Florida school districts, taking into consideration the District's funding ability based on the local property tax base. On the current fiscal year statement of activities, \$68,927,054 of current fiscal year state class size reduction revenues are now shown as part of the other unrestricted sources revenue that were reported as operating contributions in the prior fiscal year. In addition, \$192,426,396 of current fiscal year FEFP revenues are now shown as part of the other unrestricted sources revenue that were previously separately reported.

Property tax revenues increased by \$26,081,164, or 13.7 percent versus the prior fiscal year, primarily due to the collection of a new voter approved additional millage in the current fiscal year. The additional millage was approved by voters for four years pursuant to State Statutes. The rate levied for each of the four years is variable, up to a maximum of one mill, subject to approval by the District Board. The current year levy was the entire additional one mill.

The only major decrease in revenues was in operating grants and contribution, however, as discussed above, this is because class size reduction monies previously reported as operating grants and contributions are now reported as other unrestricted sources general revenues.

Instruction expenses represent 60.1 percent of total governmental-wide expenses in the 2013-14 fiscal year. Instruction expenses increased by \$13,223,400, or 4.0 percent, from the previous fiscal year due mostly because of increased salaries and benefits from a 3.5 percent average raise for teachers and increases in staffing levels, offset by decreases in the amount of depreciation charged to the instruction function.

Outside of instruction, most other functions of the District also had an increase in the 2013-14 fiscal year. The remaining increases are mainly attributable to new programs and increased funding for existing programs from the additional voter approved millage levy previously discussed.

The small increase in net position for the business-type activities resulted primarily from increased enrollment and improvement in operational efficiencies in the District's Extended Day Program.

FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS

Governmental Funds

The focus of the governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the District's financing requirements. Specifically, unassigned fund balance may serve as a useful measure of a government's net resources available for discretionary use as it represents the portion of fund balance that has not been limited to a particular purpose by an external party or the District.

The total fund balances of governmental funds decreased during the current fiscal year by \$1,525,121, excluding \$2,939,853 in adjustments made to decrease beginning fund balance. The adjustments to beginning fund balance are explained further in note II to the financial statements. The fund balance at June 30, 2014, was \$84,772,417, of which 31.0 percent, or \$26,251,129, is unassigned and available for spending at the District's discretion. The remainder of the fund balance is nonspendable, restricted, or assigned to indicate that it is 1) not in spendable form (\$1,917,477), 2) restricted for particular purposes (\$38,190,212), or 3) assigned for particular purposes (\$18,413,599).

Major Governmental Funds

The General Fund is the District's chief operating fund. At the end of the current fiscal year, unassigned fund balance is \$26,251,129, while the total fund balance is \$44,563,883. As a measure of the General Fund's liquidity, it may be useful to compare the total assigned and unassigned fund balances to General Fund total expenditures. The total assigned and unassigned fund balance is approximately 8.9 percent of the total General Fund expenditures, while total fund balance represents approximately 9.7 percent of total General Fund expenditures.

The total fund balance decreased by \$83,966 during the current fiscal year, excluding \$2,525,941 in adjustments made to decrease beginning fund balance. The adjustments to beginning fund balance are explained further in note II to the financial statements. Key factors impacting the change in fund balance are as follows:

Florida Education Finance Program revenue increased by \$22,062,902 due to larger statewide annual appropriations for education and is accounted for entirely in the General Fund. Property tax revenues of the General Fund increased by \$25,054,680 versus the prior fiscal year, entirely due to the start of a new voter approved additional millage assessed in the current fiscal year. The additional millage was approved by voters for four years pursuant to State Statutes. The rate levied for each of the four years is variable, up to a maximum of one mill, subject to approval by the District Board. The current year levy was the entire additional one mill.

Total expenditures increased by \$39,419,615, or 9.4 percent, due to increased salaries and benefits resulting from a 3.3 percent average raise for district staff; increases in staffing levels; and new or increased funding for District selected programs from the additional voter approved millage levy previously discussed.

The Federal Economic Stimulus Special Revenue Fund has total revenues and expenditures of \$3,140,102 each, and the funding was mainly used for instructional staff training. Because grant revenues attributed to the grants accounted for in this fund are not recognized until expenditures are incurred, this fund generally does not accumulate a fund balance. Activity in this fund increased over the prior fiscal year because of spend down of the Race to the Top program funding.

The Certificates of Participation Debt Service Fund had total fund balance of \$90,914 at June 30, 2014. These funds are restricted for future debt service. The fund balance decreased in the current fiscal year because of a reduction in the transfer for debt service to an amount that left little fund balance in the fund (a planned spend down of the fund balance).

The §1011.71(2) Local Capital Improvement Tax Capital Projects Fund had total fund balance of \$21,686,204 at June 30, 2014. These funds are restricted for the acquisition, construction, and maintenance of capital assets. Of the total fund balance, \$7,406,480 has been encumbered on specific capital projects. The fund balance decreased in the current fiscal year due to capital asset acquisitions greater than revenue collected (a planned spend down of capital funds).

Proprietary Funds

The District's proprietary funds provide the same type of information reported in the government-wide financial statements, but in more detail. The Extended Day Program Fund unrestricted net position increased by \$7,269 during the current fiscal year to \$191,279 at June 30, 2014. This increase occurred primarily due to increased enrollment and improvement in operational efficiencies.

GENERAL FUND BUDGETARY HIGHLIGHTS

During the 2013-14 fiscal year, the District amended its General Fund budget several times, which resulted in an increase in total budgeted revenues of \$1,227,278, or 0.3 percent. Budget increases for revenue occurred primarily for funding sources that are unpredictable and are not budgeted for until they are received. Other revenue budget adjustments were done to account for changes in estimated State funding levels.

At the same time, final appropriations (including transfers out) were greater than the original budgeted amounts by \$10,733,856, or 2.2 percent. The primary cause for the increase in appropriations was a \$7,500,000 transfer out of the General Fund to provide additional reserves in the Health self-insurance fund (previously the Prescriptions self-insurance fund). The transfer out was approved by the Board in anticipation of shifting from a fully-insured medical insurance to a partially self-insured medical insurance on January 1, 2015; at which time the District would be self-insured for both the medical and prescription components of health insurance. Other significant budget increases for appropriations were for increased costs of operating insurance coverages other than health (approximately \$1 million) and for unbudgeted software licenses (approximately \$1 million). The remaining increase in budgeted expenditures was recorded at the same time as a corresponding increase in revenues related to unpredictable funding sources.

Actual revenues are in line with the final budgeted amounts while actual expenditures are \$21,881,193, or 4.5 percent, less than final budget amounts. Of the variance in expenditures, approximately \$9.5 million was related to additional voted millage projects that were in progress as of the end of the current fiscal year, and have been reappropriated in the next fiscal year. Of the remaining approximately \$12.4 million, \$7.4 million is related to items which were carried over and reappropriated in the next fiscal year, specifically for state required programs unspent (\$2.4 million), local programs special budgets unspent (\$3.4 million) and encumbrances (\$1.6 million). The balance of approximately \$5 million is the result of savings in operations versus budgeted expenditures, most notably in salaries and benefits.

The actual ending fund balance exceeded the estimated fund balance contained in the final amended budget by \$19,352,128, primarily attributable to \$21,881,193 in expenditures less than budget as explained above and an adjustment to beginning fund balance of \$2,525,941, which is explained further in note II to the financial statements.

CAPITAL ASSETS AND LONG-TERM DEBT

Capital Assets

The District's capital assets for governmental activities as of June 30, 2014, totaled \$697,301,480 (net of accumulated depreciation and amortization). The capital assets include land; construction in progress; improvements other than buildings; buildings and fixed equipment; furniture, fixtures and equipment; motor vehicles; audio-visual materials; and computer software. The District's investment in capital assets (net of accumulated depreciation and amortization) for the current fiscal year decreased by \$20,170,188 or 2.8 percent, mainly attributable to current year depreciation and amortization of \$31,646,914, offset by additions to construction in progress and furniture, fixtures and equipment as well as motor vehicles (primarily buses).

There were three major projects in process at the end of the current fiscal year and are included as new additions to construction in progress: Jackson Heights Middle School Additions/Remodeling (\$1,562,354), Greenwood Lakes HVAC Replacement (\$2,692,218) and Geneva Elementary HVAC Replacement (\$1,980,431).

The following is a summary of the District's capital assets as of June 30, 2014, and June 30, 2013:

(**) Balances in this schedule for June 30, 2013 have been adjusted for changes to beginning balances. See note II to the financial statements regarding the changes in 2013 balances.

At June 30, 2014, the District has total long-term liabilities outstanding of \$254,608,354, net of premiums and discounts, including both bonded debt and other long-term liabilities. During the current fiscal year, debt payments, excluding refunding or amortization of premiums or discounts, totaled \$15,645,000.

During the current fiscal year, the District was included in the State Board of Education's (SBE) issuance of Capital Outlay Refunding Bonds, Series 2014A, of which the District's share was \$925,000, which are secured by a pledge of the District's portion of the State-assessed motor vehicle license tax. The State's full faith and credit is also pledged as security for these bonds. Proceeds are to be used to refund outstanding SBE Bonds.

Other SBE Bonds series outstanding at June 30, 2014, are secured in a similar manner. The remainder of the District's long-term debt is secured solely by specified revenue sources.

Subsequent to the end of the fiscal year, on July 15, 2014, the District received a rating of AA- on its Certificates of Participation from Fitch Ratings. Although the District does not have any outstanding general obligation bonds, the District's general obligation underlying rating continued to be AA from Fitch Ratings.

Additional information on the District's debt can be found in note III. I. to the financial statements.

OTHER MATTERS OF SIGNIFICANCE

In developing the fiscal year 2014-15 budget, the District considered many factors including the following major factors:

- The latest enrollment projections for the District indicate a decrease of approximately 142 students during the 2014-15 fiscal year.
- The Legislature provided the Board with an increase in formula funding of \$177 (or a positive 2.7 percent) in per student funding for the 2014-15 fiscal year.
- Employer contributions to the Florida Retirement System increased for regular employees from 7.0 to 7.4 percent of payroll for the 2014-15 fiscal year.
- Housing prices are expected to increase the taxable assessed value for the 2014-15 fiscal year.
- Contract settlements with all of the District's unions have not been finalized for the 2014-15 fiscal year.
- The District plans to convert to self-insurance for its medical coverage on January 1, 2015. This is anticipated to keep the cost of medical coverage from rising as much as it would if the District stayed fully insured.
- The District anticipates a levy of 0.7 mills on the additional voted millage, a decrease of 0.3 mills from the current rates.

REQUESTS FOR INFORMATION

DISTRICT SCHOOL BOARD OF SEMINOLE COUNTY, FLORIDA
Reconciliation of the Statement of Revenues, Expenditures and Changes in
Fund Balances of Governmental Funds to the Statement of Activities
For the Fiscal Year Ended June 30, 2014

Net Change in Fund Balances - Total Governmental Funds \$ (1,525,121)

Amounts reported for governmental activities on the Statement of Activities are different because:

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of these assets is depreciated over their estimated useful lives and reported as depreciation expense.

Expenditures for capital assets	\$ 11,769,306	
Less: Current year depreciation	<u>(31,646,914)</u>	(19,877,608)

Contributions of capital assets are not reported as revenues in the governmental funds.		67,995
-----------------------------------------------------------------------------------------	--	--------

In the Statement of Activities, only the loss on the sale/disposal of the capital assets is reported, whereas in the governmental funds, the proceeds from the sale increase financial resources. Thus, the change in net position differs from the change in fund balance by the cost of the capital assets disposed. (360,575)

Certain expenditures for software licenses paid in advance are recorded as expenditures in the period paid in the governmental funds. These expenditures are not recorded as expenditures until the period of benefit in the Statement of Activities.		219,290
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	---------

Revenues for rebates and reimbursements in the Statement of Activities that do not provide current financial resources are not reported as revenues in the governmental funds.		1,205,327
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	-----------

The issuance of long-term debt (e.g., bonds, certificates of participation) provides current financial resources to governmental funds, while the repayment of the principal of long-term consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts and similar items when debt is first issued, whereas these amounts are deferred and amortized in the Statement of Activities.

Debt issued or incurred:		
Bonds payable	(925,000)	
Plus premium	(144,762)	
Principal repayments:		
Bonds payable	1,545,000	
Certificates of participation	14,100,000	
Payment to escrow agent for refunding	<u>338,368</u>	14,913,606

Some expenses in the Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.

Change in long-term compensated absences	(355,253)	
Change in accrued interest payable	29,052	
Change in other postemployment benefits obligation	(3,894,628)	
Amortization of bonds payable premiums	1,422	
Amortization of certificate of participation premiums	1,021,394	
Amortization of certificate of participation discounts	(8,834)	
Amortization of deferred charge on refunding	<u>(1,306,469)</u>	(4,513,316)

Internal service funds are used by management to account for the cost of self-insurance, print shop and the computer store. The net revenue and transfers in of certain activities of internal service funds are reported with governmental activities.		6,341,692
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	-----------

Change in Net Position of Governmental Activities \$ (3,528,710)

NOTES TO THE FINANCIAL STATEMENTS

DISTRICT SCHOOL BOARD OF SEMINOLE COUNTY, FLORIDA
Notes to the Financial Statements
June 30, 2014

I. Summary of Significant Accounting Policies

A. Reporting Entity

The District School Board of Seminole County, Florida (District), is a part of the public education system of the State of Florida, established pursuant to Article IX, Section 4 of the Constitution of the State of Florida. The District has direct responsibility for operation, control, and supervision of District schools and is considered a primary government for financial reporting. The governing body of the District is the School Board of Seminole County, Florida (Board), which is composed of five elected members. The appointed Superintendent of Schools is the executive officer of the Board. Geographic boundaries of the District correspond with those of Seminole County.

The concept underlying the definition of the reporting entity is that elected officials are accountable to their constituents for their actions. The accompanying financial statements present the District and its component units, entities for which the District is considered to be financially accountable. Blended component units are, in substance, part of the primary government's operations, even though they are legally separate entities. Thus, blended component units are included within the statements of the primary government. Each discretely presented component unit is reported in a separate column in the government-wide financial statements to emphasize that it is legally separate from the District.

Criteria for determining if other entities are potential component units that should be reported within the District's basic financial statements are identified and described in the Governmental Accounting Standards Board's (GASB) *Codification of Governmental Accounting and Financial Reporting Standards*, Sections 2100 and 2600. The application of these criteria provides for identification of any entities for which the District is financially accountable and other organizations that the nature and significance of their relationship with the Board are such that exclusion would cause the District's basic financial statements to be misleading.

Based on the application of these criteria, the following component units are included within the District's reporting entity:

Blended Component Unit

The Seminole School Board Leasing Corporation, Inc., (Leasing Corporation) was formed to facilitate financing for the acquisition of facilities and equipment as further discussed in Note III. I. 1. The governing board of the Leasing Corporation is the same as the District School Board. Financial records for the Leasing Corporation are maintained by the District and District staff is responsible for the day-to-day operation of the Leasing Corporation. Due to the substantive economic relationship between the District and the Leasing Corporation, the financial activities of the Leasing Corporation are blended in the financial statements. The Leasing Corporation does not issue separate financial statements.

I. Summary of Significant Accounting Policies (continued)

A. Reporting Entity (continued)

Discretely Presented Component Units

The component units column in the basic financial statements includes the financial data of the District's other component units. The Foundation for Seminole County Public Schools, Inc. (Foundation) is a not-for-profit corporation organized and operated as a direct-support organization under Section 1001.453, Florida Statutes, to raise funds; receive, hold, invest, and administer property; and to make expenditures for the benefit of the District. Section 1001.453, Florida Statutes, requires the Foundation to be authorized and approved by the District. Because of the nature and significance of its relationship with the District, the Foundation is considered a component unit. The Foundation has its own Board and does not provide services entirely or nearly entirely to the District, and therefore is discretely presented, rather than blended.

The District's charter schools, Choices in Learning, Inc., Galileo School for Gifted Learning and UCP Seminole Charter School (Charter Schools) are separate not-for-profit corporations organized pursuant to Chapter 617, Florida Statutes, the Florida Not-For-Profit Corporation Act, and Section 1002.33, Florida Statutes. The Charter Schools operate under a charter approved by their sponsor, the District School Board of Seminole County. In accordance with a ruling by and requirement of the Florida Department of Education, the charter schools are included as component units of the District. According to the Florida Department of Education, the charter schools are fiscally dependent on the District for their tax levy and the majority of their budget and create a financial burden on the District because the charter schools' full-time equivalent (FTE) student enrollment is the basis for the District to provide funding to the charter schools.

The amounts reported on the District's financial statements were derived from the Foundation's and Charter Schools' audited financial statements for the fiscal year ended June 30, 2014. The financial statements and reports for the audits conducted by independent certified public accountants are filed in the District's administrative office at 400 East Lake Mary Boulevard, Sanford, Florida. None of the component units are considered to be major funds in relation to the primary government. All financial statement notes for the Foundation and the Charter Schools are omitted from this report since separate financial statements are available. The notes to the Foundation's and Charter Schools' statements should be used as an integral part to interpreting the financial statements of these component units.

B. Basis of Presentation - Government-wide Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. All fiduciary activities are reported only in the fund financial statements. Governmental activities, which normally are supported by taxes, intergovernmental revenues, and other nonexchange transactions, are reported separately from business-type activities, which rely to a significant extent on fees charged to external customers for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

I. Summary of Significant Accounting Policies (continued)

B. Basis of Presentation - Government-wide Financial Statements (continued)

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds and internal service funds, while business-type activities incorporate data from the government's enterprise funds. Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements.

The effects of interfund balances and activities have been eliminated from the government-wide financial statements, except for transfers between governmental activities and business-type activities.

The statement of activities presents a comparison between direct expenses and program revenues for each function or program of the District's governmental activities and for each segment of the business-type activities. Direct expenses are those that are specifically associated with a service, program, or department and are thereby clearly identifiable to a particular function. Depreciation or amortized expenses are allocated to each function or program of the primary government.

C. Basis of Presentation - Fund Financial Statements

The fund financial statements provide information about the District's funds, including the fiduciary funds and blended component units. Separate statements for each fund category – governmental, proprietary and fiduciary – are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental funds are aggregated and reported as non-major funds. Major individual governmental and enterprise funds are reported as separate columns in the fund financial statements. Because the focus of governmental fund financial statements differs from the focus of government-wide financial statements, reconciliations are presented with each of the governmental fund financial statements.

The District reports the following major governmental funds:

The *General Fund* is the District's primary operating fund. It accounts for all financial resources not required to be accounted for in another fund, and for certain revenues from the State that are legally restricted to be expended for specific current operating purposes.

The *Federal Economic Stimulus Fund* is a special revenue fund that accounts for certain Federal grant program resources related to the American Recovery and Reinvestment Act (ARRA). The fund has been determined to be major based on requirements provided by the Florida Department of Education.

The *Certificates of Participation Fund* is a debt service fund that accounts for the accumulation of resources for, and the payment of, debt principal, interest, and related costs on the long-term certificates of participation.

I. Summary of Significant Accounting Policies (continued)

C. Basis of Presentation - Fund Financial Statements (continued)

The §1011.71(2), *Local Capital Improvement Tax Fund* is a capital projects fund that accounts for the funds generated by the local capital improvement tax levied under Section 1011.71(2), Florida Statutes. The taxes are used for educational capital outlay needs, including new construction, renovation and remodeling projects, and debt service payments on certificates of participation.

The District reports the following major enterprise fund:

The *Extended Day Program Fund* is an enterprise fund that accounts for the financial resources of the District's Extended Day Program. This program provides before and after school care to students.

Additionally, the District reports the following fund types:

Internal Service Funds account for print shop, computer store, health insurance, and risk management services (including claims for workers' compensation, general liability, and property damage) provided to cost centers and schools of the District on a cost-reimbursement basis. The District has four internal service funds.

Agency Funds account for assets held by the District in a trustee capacity or as an agent for individuals, private organizations, and resources of the school internal funds, which are used to administer moneys collected at schools in connection with student and club activities. The District has two agency funds, the *Student and Club Activities Fund* and *Employee Benefit Program Fund*.

During the course of operations the District has activity between funds for various purposes. Any residual balances outstanding between funds at year end are reported as due from/to other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental and internal service funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column. Similarly, balances between the funds included in business-type activities (i.e., the enterprise funds) are eliminated so that only the net amount is included as internal balances in the business-type activities column.

Further, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column. Similarly, balances between the funds included in business-type activities are eliminated so that only the net amount is included as transfers in the business-type activities column.

D. Measurement Focus and Basis of Accounting

Accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide financial statements are reported using the *economic resource measurement focus* and the *accrual basis of accounting*. Revenues are recognized when earned and expenses are recognized when a liability is incurred, regardless of the timing of the related cash flows. Property taxes are recognized in the year for which they are levied. Revenues from grants, entitlements, and donations are recognized in the fiscal year in which all eligibility requirements imposed by the provider have been satisfied.

The governmental fund financial statements are reported using the *current financial resource measurement focus* and the *modified accrual basis of accounting*. Revenues, except for certain grant revenues, are recognized when they become measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. The District considers revenues to be available if they are collected within 60 days of the end of the current fiscal year. Expenditures are generally recognized when the related fund liability is incurred, as under accrual accounting. However, debt service expenditures, claims and judgments, other postemployment benefits, and compensated absences, are only recorded when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds. Issuances of long-term debt are reported as other financing sources. Allocations of cost, such as depreciation, are not recognized in governmental funds.

State revenues, property taxes, charges for services, and investment income associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. When grant terms provide that the expenditure of resources is the prime factor for determining eligibility for Federal, State, and other grant resources, revenue is recognized at the time the expenditure is made. All other revenue items are considered to be measurable and available only when cash is received by the District.

The proprietary funds are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. The agency funds have no measurement focus, but use the *accrual basis of accounting* for reporting assets and liabilities.

The UCP Seminole Charter School is accounted for under the not-for-profit basis of accounting and uses the accrual basis of accounting whereby revenues are recognized when earned and expenses are recognized when incurred.

The Foundation, Choices in Learning, Inc. and Galileo School for Gifted Learning are accounted for as governmental organizations and follow the same accounting model as the District's governmental activities.

E. Budgetary Information

Budgetary Basis of Accounting

The Board follows procedures established by State statutes and State Board of Education rules in establishing budget balances for governmental funds, as described below:

- Budgets are prepared, public hearings are held, and original budgets are adopted annually for all governmental fund types in accordance with procedures and time intervals prescribed by law and State Board of Education rules.
- Appropriations are controlled at the object level (e.g., salaries, purchased services, and capital outlay) within each functional activity (e.g., instruction, student personnel services, and school administration) and may be amended by resolution at any Board meeting prior to the due date for the annual financial report. This object level is the legal level of budgetary control.
- Budgets are prepared using the same modified accrual basis as is used to account for governmental funds.
- Budgetary information is integrated into the accounting system and, to facilitate budget control, budget balances are encumbered when purchase orders are issued. Appropriations lapse at fiscal year-end and encumbrances outstanding are honored from the subsequent year's appropriations.

F. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance

1. Cash and cash equivalents

Cash deposits are held by banks qualified as public depositories under Florida law. All deposits are insured by Federal depository insurance, up to specified limits, or collateralized with securities held in Florida's multiple financial institution collateral pool as required by Chapter 280, Florida Statutes. For the enterprise and internal service funds, the statements of cash flows consider cash as those funds deposited in demand deposit accounts and cash equivalents as those amounts invested in money market funds.

2. Investments

Investments consist of amounts placed in the State Board of Administration (SBA) debt service accounts for investment of debt service funds, amounts placed with the SBA for participation in the Florida PRIME investment pool created by Section 218.405, Florida Statutes, and those made locally. The investment pools operate under investment guidelines established by Section 215.47, Florida Statutes.

I. Summary of Significant Accounting Policies (continued)

F. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

2. Investments (continued)

The District's investments in the SBA debt service accounts are administered by the State Board of Education (SBE) to provide for debt service payments on bonded debt issued by the SBE for the benefit of the District. Disclosures for the debt service accounts are included in the notes to the financial statements of the State of Florida's Comprehensive Annual Financial Report. The District relies on policies developed by the SBA for managing interest rate risk and credit risk for this account.

The District's investments in Florida PRIME, which the SBA indicates is a Securities and Exchange Commission Rule 2a7-like external investment pool, are similar to money market funds in which shares are owned in the fund rather than the underlying investments. These investments are reported at fair value, which is amortized cost.

The District has local investments in the Florida Educational Investment Trust. The trust is also a Securities and Exchange Commission Rule 2a7-like external investment pool. These investments are reported at fair value, which is amortized cost.

Other investments made locally consist of Money Market Mutual Funds, United States Treasury Securities, Obligations of United States Government Instrumentalities and Agencies, State and Local Debt, and Commercial Paper. These investments are reported at fair value.

Types and amounts of investments held at fiscal year-end are described in a subsequent note.

3. Inventories

Inventories consist of expendable supplies held for consumption in the course of District operations. The supply and transportation inventories are stated using a weighted average cost. The print shop and maintenance inventories are stated at last invoice price that approximates the first-in, first-out basis. Food service inventory is stated at cost on the first-in, first-out basis. United States Department of Agriculture donated foods are stated at fair value as determined at the time of donation to the District's food service program by the Florida Department of Agriculture and Consumer Service, Bureau of Food Distribution. The costs of inventories are recorded as expenditures when used rather than purchased.

4. Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods. In the government-wide and proprietary fund statements, these items are recorded as prepaid items and the cost of these items is recorded as an expense when consumed rather than when purchased. In the governmental fund statements, the purchases method is used, and costs applicable to future accounting periods are recorded as expenditures when paid.

Notes to the Financial Statements

I. Summary of Significant Accounting Policies (continued)

F. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

5. Capital Assets

Expenditures for capital assets acquired or constructed for general District purposes are reported in the governmental fund that financed the acquisition or construction. The capital assets so acquired are reported at cost in the government-wide statement of net position, but are not reported in the governmental fund financial statements. Capital assets are defined by the District as those having an estimated useful life of more than one year and costing more than \$1,000 for furniture, fixtures and equipment; motor vehicles; audio-visual materials; and computer software; and \$50,000 for improvements other than buildings; buildings and fixed equipment; and construction in progress. Such assets are recorded at historical cost or estimated historical cost. Donated assets are recorded at fair value at the date of donation. All land purchases are included in capital assets regardless of cost.

The costs of normal maintenance and repairs that do not add to the value of the assets or materially extend assets' lives are not capitalized. Gains or losses on disposal of capital assets are included as income in the period of disposal.

Land and construction in progress are not depreciated. Capital assets are depreciated or amortized using the straight-line method over the following estimated useful lives:

<u>Description</u>	<u>Estimated Lives</u>
Improvements Other than Buildings	15 years
Buildings and Fixed Equipment	10 – 40 years
Furniture, Fixtures and Equipment	6 years
Motor Vehicles	10 years
Audio-Visual Materials and Computer Software	5 years

Current year information relative to changes in capital assets is described in a subsequent note.

6. Unearned Revenue

Unearned revenue presented on both the governmental and proprietary fund financial statements represents advance collection of funds for services to be provided in future reporting periods, consisting primarily of advance payments for charges for services for food services and extended day programs. Unearned revenues on the government-wide financial statements are the same as those reported on the governmental and proprietary statements.

Notes to the Financial Statements
June 30, 2014

I. Summary of Significant Accounting Policies (continued)

F. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

7. Long-Term Liabilities

Long-term obligations that will be financed from resources to be received in the future by governmental funds are reported as liabilities in the government-wide statement of net position. Debt premiums and discounts are amortized, using a straight-line method over the term of the related debt. Bonds and certificates of participation payable are reported net of applicable premiums and discounts.

In the governmental fund financial statements, bonds and other long-term obligations are not recognized as liabilities until due. Governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued and premiums are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Changes in long-term liabilities for the current year are reported in a subsequent note.

8. Compensated Absences

In the government-wide financial statements, compensated absences are accrued as liabilities to the extent that it is probable that the benefits will result in a payment. A liability is reported for compensated absences in the governmental fund financial statements only if they have matured. The liability for compensated absences includes salary-related benefits, where applicable. For the calculation of sick leave termination liability, the District changed to the termination payments method in the current year (see note II).

Changes in compensated absences for the current year are reported in a subsequent note.

9. Deferred Outflows / Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for *deferred outflows of resources*. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to future periods and so will not be recognized as an outflow of resources (expense/ expenditure) until then. The District has no deferred outflows of resources at June 30, 2014.

In addition to liabilities, the statement of financial position will sometimes report a separate section for *deferred inflows of resources*. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to future periods and so will not be recognized as an inflow of resources (revenue) until that time. The District has only one type of item, which arises only under a modified accrual basis of accounting, that qualifies for reporting in this category. Accordingly, the item, *unavailable revenue*, is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from rebates and reimbursements. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available.

Notes to the Financial Statements
June 30, 2014

I. Summary of Significant Accounting Policies (continued)

F. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

10. Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes.

Nonspendable fund balance includes items that cannot be spent because they are not in spendable form, such as inventory. All other categories of fund balance other than nonspendable are collectively known as spendable fund balance.

Restricted fund balances encompass the portion of net fund resources subject to externally enforceable legal restrictions. This includes externally imposed restrictions by creditors (such as through debt covenants), grantors, contributors, laws or regulations of other governments, as well as restrictions imposed by law through constitutional provisions or enabling legislation. The categories of fund balance other than restricted and nonspendable are collectively known as unrestricted fund balance.

The District itself can establish limitations on the use of unrestricted resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The Board (the District's highest level of decision-making authority) has not established a policy to commit fund balance, therefore no such balance is reported.

The District and the Board also have not established a policy to assign fund balance. However, certain actions taken by the District, as subsequently described, assign fund balance in accordance with GASB Statement No. 54. Included in assigned fund balance is an amount for purchase orders obligations outstanding that have not been already included as restricted fund balance. In addition, an amount is included in assigned fund balance for certain program budgets carried over from year-to-year outside of those required by State Statute. Finally, part of the nonmajor capital projects fund balance represents a residual unspent balance of funds that are not restricted by external parties, but have been assigned by the Board for specific capital projects.

The residual fund balance remaining is reported as unassigned fund balance and is the excess of nonspendable, restricted, committed, and assigned fund balance.

11. Fund Balance Flow Assumption

Sometimes the District will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the District's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

Notes to the Financial Statements
June 30, 2014

I. Summary of Significant Accounting Policies (continued)

F. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

12. Minimum Fund Balance Policy

The Board has set a policy to provide for a 4 percent minimum unassigned fund balance for the General Fund, if feasible, based on the recurring expenditure budget; this amount is currently reported as unassigned fund balance and totals \$17,836,274 of the adopted 2014-15 fiscal year budget.

13. Net Position

The government-wide and business-type activities fund financial statements utilize a net position presentation. Net position is categorized as net investment in capital assets, restricted or unrestricted. Net investment in capital assets groups all capital assets into one component of net position; accumulated depreciation and the outstanding balances of debt that are attributed to the acquisition, construction or improvement of these assets reduce the balance in this category. Restricted net position includes all net position with external restrictions imposed by creditors, grantors, or laws and regulations of other governments. Unrestricted net position is the residual amount of net position of the District that is not restricted for any particular purpose.

14. Net Position Flow Assumption

Sometimes the District will fund outlays for a particular purpose from both restricted (e.g. grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the District's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

G. Revenues and Expenditures/Expenses

1. Program Revenues

Amounts reported as program revenues include charges paid by the recipient of the goods or services offered by the program, and grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. All taxes, including those dedicated for specific purposes, and other internally dedicated resources are reported as general revenues rather than program revenues. Revenues that are not classified as program revenues are presented as general revenues. The comparison of direct expenses with program revenues identifies the extent to which each governmental function or business segment is self-financing or draws from the general revenues of the District.

I. Summary of Significant Accounting Policies (continued)

G. Revenues and Expenditures/Expenses (continued)

2. State Revenue Sources

Significant revenues from State sources for current operations include the Florida Education Finance Program administered by the Florida Department of Education (Department) under the provisions of Section 1011.62, Florida Statutes. In accordance with this law, the District determines and reports the number of full-time equivalent (FTE) students and related data to the Department. The Department performs certain edit checks on the reported number of FTE and related data, and calculates the allocation of funds to the District. The District is permitted to amend its original reporting for a period of five months following the date of the original reporting. Such amendments may impact funding allocations for subsequent years. The Department may also adjust subsequent fiscal period allocations based upon an audit of the District's compliance in determining and reporting FTE and related data. Normally, such adjustments are treated as reductions or additions of revenue in the year when the adjustments are made.

The State provides financial assistance to administer certain educational programs. State Board of Education rules require that revenue earmarked for certain programs be expended only for the program for which the money is provided, and require that the money not expended as of the close of the fiscal year be carried forward into the following year to be expended for the same educational programs. The Department generally requires that these educational program revenues be accounted for in the General Fund. A portion of the fund balance of the General Fund is restricted in the governmental fund financial statements for the balance of categorical and earmarked educational program resources.

A schedule of revenue from State sources for the current year is presented in a subsequent note.

3. District Property Taxes

The Board is authorized by State law to levy property taxes for district school operations, capital improvements, and debt service.

Property taxes consist of ad valorem taxes on real and personal property within the District. Property values are determined by the Seminole County Property Appraiser, and property taxes are collected by the Seminole County Tax Collector.

The Board adopted the 2013 tax levy on September 10, 2013. Tax bills are mailed in October and taxes are payable between November 1 of the year assessed and March 31 of the following year at discounts of up to 4 percent for early payment.

Taxes become a lien on the property on January 1, and are delinquent on April 1, of the year following the year of assessment. State law provides for enforcement of collection of personal property taxes by seizure of the property to satisfy unpaid taxes, and for enforcement of collection of real property taxes by the sale of interest-bearing tax certificates to satisfy unpaid taxes. The procedures result in the collection of essentially all taxes prior to June 30 of the year following the year of assessment.

G. Revenues and Expenditures/Expenses (continued)

3. District Property Taxes (continued)

Property tax revenues are recognized in the government-wide financial statements when the Board adopts the tax levy. Property tax revenues are recognized in the governmental fund financial statements when taxes are received by the District, except that revenue is accrued for taxes collected by the Seminole County Tax Collector at fiscal year-end but not yet remitted to the District.

Millages and taxes levied for the current year are presented in a subsequent note.

4. Educational Impact Fees

Seminole County imposes an educational impact fee based on an ordinance adopted by the County Commission in 1992. This ordinance was most recently amended in October 2007, when Ordinance 2007-41 established, in part, revised rates to be collected. The educational impact fee is collected by the County and each municipality within the County based on an interlocal agreement. The fees shall be used solely for the purpose of providing capital improvements to the public educational system necessitated by new residential development, and shall not be used for any expenditure that would be classified as a maintenance or repair. The authorized uses include, but are not limited to, land acquisition; facility design and construction costs; furniture and equipment; and payment of principal, interest, and related costs of indebtedness necessitated by new residential development.

5. Federal Revenues Sources

The District receives Federal awards for the enhancement of various educational programs. Federal awards are generally received based on applications submitted to, and approved by, various granting agencies. For Federal awards for which a claim to these grant proceeds is based on incurring eligible expenditures, revenue is recognized to the extent that eligible expenditures have been incurred.

6. Proprietary Funds Operating and Nonoperating Revenues and Expenses

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the proprietary funds' principal ongoing operations. The principal operating revenues of the District's enterprise fund and internal service funds are charges for sales and services and premiums charged to the District and employees under various insurance programs. The principal operating expenses for the enterprise fund and the internal service funds include salary and benefits, cost of sales and services, claims, and premiums for excess coverage. All revenues and expenses not meeting these definitions are reported as nonoperating revenues and expenses.

II. Accounting Changes

During the 2013-14 fiscal year, certain accounting changes and adjustments were made that required the restatement of fund balances and net position. The restatements are summarized below as to their effect on beginning fund balance/net position:

	Fund Statements			Government- wide Statements
	General Fund	Nonmajor Governmental	Internal Service	Governmental Activities
Beginning fund balance / net position, as previously reported	\$ 47,173,790	\$ 17,918,896	\$ 12,775,390	\$ 556,001,617

A. Prior Period Adjustments

A summary of the nature of the prior period adjustments is shown below:

1. Accounts Receivable – The District had \$781,866 in amounts that were receivable to internal service funds and governmental activities as of June 30, 2013, that were not accrued and reported in the prior period.
2. Accounts Payable – The District had a total of \$1,229,304 in vendor balances payable as of June 30, 2013, that were not accrued and reported in the prior period. Of the total amount, \$1,182,449 was payable by the General Fund and \$46,855 was payable by internal service funds. The total amount was payable by governmental activities.
3. Benefits Payable – The District had a total of \$1,365,988 in health insurance benefits payable as of June 30, 2013, over the amount previously reported. Of the total amount, \$1,343,492 was payable by the General Fund and \$22,496 was payable by nonmajor governmental funds. The total amount was payable by governmental activities.
4. Unearned Revenues – The District had \$391,416 in unearned revenues in nonmajor governmental funds and governmental activities as of June 30, 2013. The amount was previously reported as revenue in both the governmental funds and governmental activities.
5. Capital Assets – The District previously over-reported \$4,246,475 of accumulated depreciation in governmental activities.

A. Prior Period Adjustments (continued)

The effect of the prior period adjustments to the beginning balances of capital assets, presented in a subsequent note, is as follows:

Primary Government	July 1, 2013 as Previously Reported	Prior Period Adjustment	July 1, 2013 as Restated
Governmental activities:			
Capital assets, not being depreciated or amortized:			
Land	\$ 50,932,754	\$ -	\$ 50,932,754
Construction in progress	-	-	-
Total capital assets, not being depreciated or amortized	<u>50,932,754</u>	<u>-</u>	<u>50,932,754</u>
Capital assets, being depreciated or amortized:			
Buildings and fixed equipment	996,445,048	-	996,445,048
Improvements other than buildings	13,245,614	-	13,245,614
Furniture, fixtures, and equipment	51,705,136	-	51,705,136

Total capital assets, being depreciated or amortized	<u>1,100,792,780</u>	<u>-</u>	<u>1,100,792,780</u>
Less accumulated depreciation or amortization for:			
Buildings and fixed equipment	353,546,712	-	353,546,712
Improvements other than buildings	10,660,985	-	10,660,985
Furniture, fixtures, and equipment	45,142,304	(4,166,494)	40,975,810
Motor vehicles	25,019,113	(21,381)	24,997,732
Audio-visual materials	31,909	-	31,909
Computer software	4,099,318	(58,600)	4,040,718
Total accumulated depreciation or amortization	<u>438,500,341</u>	<u>(4,246,475)</u>	<u>434,253,866</u>
Total capital assets, being depreciated or amortized, net	<u>662,292,439</u>	<u>4,246,475</u>	<u>666,538,914</u>
Governmental activities capital assets, net	<u>\$ 713,225,193</u>	<u>\$ 4,246,475</u>	<u>\$ 717,471,668</u>

The effect of each of the prior period adjustments on the amount reported for changes in net position or changes in fund balances of the fiscal year ended June 30, 2013, does not materially change the amounts previously reported. This is because the material amount of the prior period adjustments would have offset similar adjustments to the beginning balances for the previous period as well (specifically, July 1, 2012).

B. Change in Accounting Principles

The District previously calculated its long-term liability for its sick leave portion of compensated absences using the vesting method. During the 2013-14 fiscal year, the District changed from the vesting method to the termination payments method. The new method is considered preferable because the vesting method required substantial assumptions not required to be made in the termination payments method. Governmental activities net position at July 1, 2013, was restated by \$3,654,311 to properly report the effect of this accounting change.

II. Accounting Changes (continued)

B. Change in Accounting Principles (continued)

The effect of the restatement of compensated absences to the beginning balances of long term liabilities, presented in a subsequent note, is as follows:

Primary Government	July 1, 2013 as Previously Reported	Change in Accounting Principle	July 1, 2013 as Restated
Governmental activities:			
Certificates of participation payable	\$ 185,240,000	\$ -	\$ 185,240,000

Other postemployment benefits payable	19,577,148	-	19,577,148
Total long-term liabilities	<u>\$ 270,489,380</u>	<u>\$ (3,654,311)</u>	<u>\$ 266,835,069</u>

C. Change in Reporting Entity

During the 2013-14 fiscal year, the District added four component units with beginning net position balances: Choices in Learning, Inc., Galileo School for Gifted Learning, UCP Seminole Charter School and The Foundation for Seminole County Public Schools, Inc. These changes to the District's reporting entity affect the comparability of amounts reported for the 2013-14 fiscal year with amounts reported for the 2012-13 fiscal year. As a result of these changes, beginning net position for the component units as a whole, totaling \$6,213,598, has been added.

III. Detail Notes on All Activities and Funds

A. Cash Deposits with Financial Institutions

Custodial Credit Risk - Cash Deposits. In the case of deposits, this is the risk that in the event of a bank failure, the District's deposits may not be returned to it. It is the policy of the District that all cash deposits are to be held in institutions which are qualified as public depositories under Florida law. The District is in compliance with this policy, and all bank balances of the District are fully insured or collateralized as required by Chapter 280, Florida Statutes.

Cash balances from all funds are combined and invested to the extent available. Earnings are allocated monthly to each fund based on average daily balances.

- (1) Investment managed by the Florida SBA, but is outside the scope of the District's investment policy, see note I. F. 2.
(2) Investment not rated by rating agency, however meets all investment policy requirements.

Credit Risk. Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. District policy limits the investments allowed to be purchased to the following:

- Florida State Board of Administration Funds (Florida PRIME)
- United States Government Securities
- Obligations of United States Government Agencies or Instrumentalities
- Repurchase Agreements collateralized by obligations of the United States Government, its Agencies or Instrumentalities
- Time Deposit or Savings Accounts
- Intergovernmental Investment Pools
- Money Market Funds that are registered under the Federal Investment Company Act of 1940 and operate in accordance with 17 Code of Federal Regulations, Section 270.2a-7, which stipulates that money market funds must have an average, weighted maturity of 90 days or less and where the share value of the money market funds is equal to one dollar
- Commercial Paper and Bankers Acceptances that are rated at least "P-1" by Moody's and "A-1" by Standard and Poor's (S&P)
- State and/or local government taxable and/or tax-exempt debt that are rated at least "Aa" by Moody's and "AA" by Standard & Poor's on long-term debt or "MIG-2" by Moody's and "SP-2" by Standard & Poor's on short-term debt

B. Investments (continued)

Interest Rate Risk. Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. District policy limits the length of investments to the type of investments ranging up to five years and to the extent possible investment of current operating funds to two years. All investments, during the fiscal year and at year-end, were authorized in District policy.

The following schedule summarizes the investments held as of June 30, 2014, by annual maturity for assessing interest rate risk:

Primary Government Investments	Total Fair Value	Investment Maturities			
		Less Than 1 Year	1 Year - 2 Years	2 Years - 3 Years	3 Years - 4 Years
State Board of Administration:					
Florida PRIME	\$ 20,102,311	\$ 20,102,311	\$ -	\$ -	\$ -

Custodial Credit Risk - Investments. Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the District will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. District policy requires that all investments, other than investments in money market funds, Florida Education Investment Trust, and the State Board of Administration, be held in the District's name in custodial and/or trustee accounts by an independent custodial bank. All investments, except for investments in money market funds, Florida Education Investment Trust, and the State Board of Administration, were held in custodial accounts in the District's name by an independent custodial bank.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of the District's investment in a single issuer. Composition of investment portfolio, calculated based on the fair value, is limited by District policy.

E. Pension Obligations

Florida Retirement System

Plan Description. Essentially all regular employees of the District are eligible to enroll as members of the State-administered Florida Retirement System (FRS). Provisions relating to the FRS are established by Chapters 121 and 122, Florida Statutes; Chapter 112, Part IV, Florida Statutes; Chapter 238, Florida Statutes; and Florida Retirement System Rules, Chapter 60S, Florida Administrative Code; wherein eligibility, contributions, and benefits are defined and described in detail. The FRS is a single retirement system administered by the Department of Management Services, Division of Retirement, and consists of two cost-sharing, multiple-employer retirement plans and other nonintegrated programs. These include a defined-benefit pension plan (Plan), a Deferred Retirement Option Program (DROP), and a defined-contribution plan, referred to as the Florida Retirement System Investment Plan (Investment Plan).

Employees enrolled in the Plan prior to July 1, 2011, vest at six years of creditable service and employees enrolled in the Plan on or after July 1, 2011, vest at eight years of creditable service. All vested members, enrolled prior to July 1, 2011, are eligible for normal retirement benefits at age 62 or at any age after 30 years of service. All members enrolled in the Plan on or after July 1, 2011, once vested, are eligible for normal retirement benefits at age 65 or any time after

33 years of creditable service. Members of both Plans may include up to 4 years of credit for military service toward creditable service. The Plan also includes an early retirement provision; however, there is a benefit reduction for each year a member retires before his or her normal retirement date. The Plan provides retirement, disability, death benefits, and annual cost-of-living adjustments.

DROP, subject to provisions of Section 121.091, Florida Statutes, permits employees eligible for normal retirement under the Plan to defer receipt of monthly benefit payments while continuing employment with an FRS employer. An employee may participate in DROP for a period not to exceed 60 months after electing to participate, except that certain instructional personnel may participate for up to 96 months. During the period of DROP participation, deferred monthly benefits are held in the FRS Trust Fund and accrue interest.

As provided in Section 121.4501, Florida Statutes, eligible FRS members may elect to participate in the Investment Plan in lieu of the FRS defined-benefit plan. District employees participating in DROP are not eligible to participate in this program. Employer and employee contributions are defined by law, but the ultimate benefit depends in part on the performance of investment funds. The Investment Plan is funded by employer and employee contributions that are based on salary and membership class (Regular, Elected County Officers, etc.). Contributions are directed to individual member accounts, and the individual members allocate contributions and account balances among various approved investment choices. Employees in the Investment Plan vest at one year of service.

The State of Florida establishes contribution rates for participating employers and employees. Contribution rates during the 2013-14 fiscal year were as follows:

Class	Percent of Gross Salary	
	Employee	Employer (A)
Florida Retirement System, Regular	3.00	6.95
Florida Retirement System, Elected County Officers	3.00	33.03
Florida Retirement System, Senior Management Service	3.00	18.31
Deferred Retirement Option Program - Applicable to Members from All of the Above Classes	0.00	12.84
Florida Retirement System, Reemployed Retiree	(B)	(B)

(A) Employer rates include 1.20 percent for the postemployment health insurance supplement. Also employer rates, other than DROP participants, include 0.03 percent for administrative costs of the Florida Retirement System.

(B) Contribution rates are dependent upon the retirement class in which the employee was reemployed.

The District's liability for participation is limited to the payment of the required contribution at the rates and frequencies established by law on future payrolls of the District. The District's contributions including employee contributions for the fiscal year ended June 30, 2012, June 30, 2013, and June 30, 2014, totaled \$19,041,941, \$19,989,227, \$27,710,399, respectively, which were equal to the required contributions for each fiscal year.

E. Pension Obligations (continued)

There were 1,493 District participants in the Investment Plan during the 2013-14 fiscal year. The District's contributions including employee contributions to the Investment Plan totaled \$4,881,038, which was equal to the required contribution for the 2013-14 fiscal year.

Financial statements and other supplementary information of the FRS are included in the State's Comprehensive Annual Financial Report, which is available from the Florida Department of Financial Services, Bureau of Financial Reporting Statewide Financial Reporting Section by mail at 200 E. Gaines Street, Tallahassee, Florida 32399-0364; by telephone at (850) 413-5511; or at the Department's Web site (www.myfloridacfo.com). An annual report on the FRS, which includes its financial statements, required supplementary information, actuarial report, and other relevant information, is available from the Florida Department of Management Services, Division of Retirement, Research and Education Section, by mail at P.O. F. Other Postemployment Benefits (OPEB) Obligations

Plan Description. The Other Postemployment Benefits Plan (OPEB Plan) is a single-employer defined benefit plan administered by the District. Pursuant to the provisions of Section 112.0801, Florida Statutes, employees who retire from the District are eligible to participate in the District's health and hospitalization plan for medical, prescription drug, and life coverage. The District subsidizes the premium rates paid by retirees by allowing them to participate in the OPEB Plan at reduced or blended group (implicitly subsidized) premium rates for both active and retired employees. These rates provide an implicit subsidy for retirees because, on an actuarial basis, their current and future claims are expected to result in higher costs to the OPEB Plan on average than those of active employees. The District does not offer any explicit subsidies for retiree coverage. Retirees are assumed to enroll in the Federal Medicare program for their primary coverage as soon as they are eligible. The OPEB Plan does not issue a stand-alone report, and is not included in the report of a public employee retirement system or other entity.

Funding Policy. Plan contribution requirements of the District and OPEB Plan members are established and may be amended through recommendations of the Insurance Committee and action from the Board. The District has not advance-funded or established a funding methodology for the annual OPEB costs or the net OPEB obligation, and the OPEB Plan is financed on a pay-as-you-go basis. For the 2013-14 fiscal year, 2,058 retirees received other postemployment life insurance benefits and 582 received other postemployment health insurance benefits. The District provided required contributions of \$1,887,279 toward the annual OPEB cost, net of retiree contributions totaling \$4,834,342. The amount paid by the District represents 0.59 percent of covered payroll. The amount paid by retirees represents 1.52 percent of covered payroll.

F. Other Postemployment Benefits (OPEB) Obligations (continued)

Annual OPEB Cost and Net OPEB Obligations. The District's annual OPEB cost (expense) is calculated based on the annual required contributions (ARC), an amount actuarially determined in accordance with parameters of GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. The ARC represents a level of funding that if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The following table shows the District's annual OPEB cost for the fiscal year, the amount actually contributed to the OPEB plan, and changes in the District's net OPEB obligation:

Normal cost (service cost)	\$ 2,785,041
Amortization of Unfunded actuarial accrued liability	3,242,830
Interest on normal cost and amortization	226,045
Actuarially determined contribution (ARC)	6,253,916
Interest on net OPEB obligation	734,192
Adjustment to actuarially determined contribution	(1,206,201)
Annual OPEB cost	5,781,907
Less: Contributions made	1,887,279
Change in net OPEB obligation	3,894,628
Net OPEB obligation, beginning	19,577,148
Net OPEB obligation, ending	\$ 23,471,776

The District's annual OPEB cost, the percentage of annual OPEB cost contributed to the OPEB plan, and the net OPEB obligations as of June 30, 2014, and the two preceding fiscal years, were as follows:

Fiscal Year Ended June 30,	Annual OPEB Cost	Employer Contributions	Percent Contributed	Net OPEB Obligation
2014	\$ 5,781,907	\$ 1,887,279	32.64%	\$ 23,471,776
2013	5,352,208	2,146,649	40.11%	19,577,148
2012	5,946,546	3,376,620	56.78%	16,371,589

Funded Status and Funding Progress. The funded status of the plan as of July 1, 2013, the most recent valuation date, was as follows:

Actuarial accrued liability (AAL)	\$ 54,609,859
Actuarial value of plan assets	-
Unfunded actuarial accrued liability (UAAL)	\$ 54,609,859
Funded ratio (actuarial value of plan assets/AAL)	0.00%
Covered payroll (active plan members)	\$ 318,829,327
UAAL as a percentage of covered payroll	17.13%

F. Other Postemployment Benefits (OPEB) Obligations (continued)

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment and termination, mortality, and the healthcare cost trends. Amounts determined regarding the funded status of the OPEB plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The required schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of OPEB plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

Actuarial Methods and Assumptions. Projections of benefits for financial reporting purposes are based on the substantive OPEB plan provisions, as understood by the employer and participating members, and include the type of benefits provided at the time of each valuation and the historical pattern of sharing benefit costs between the employer and participating members. The actuarial methods and assumptions used include techniques that are designed to reduce the effect of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The ARC for the OPEB Plan was determined as part of the actuarial valuation using the following methods and assumptions:

Actuarial Cost Method	Projected unit credit
Amortization Method	Level dollar, closed
Amortization Period, Original	30 years

H. Risk Management

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Workers' compensation, automobile liability, and general liability coverage are being provided on a self-insured basis up to specified limits. The District entered into agreements with various insurance companies to provide specific excess coverage of claim amounts above the stated amount on an individual claim basis and aggregate excess coverage when total claims minus specific excess coverage exceeds the loss fund established annually by the District. The District contracted with an insurance administrator to administer these self-insurance programs, including the processing, investigating, and payment of claims.

The District retains \$350,000 per occurrence for workers' compensation liability, which will increase to \$500,000 effective July 1, 2014. The District retains \$250,000 per occurrence for errors and omissions exposure, which will decrease to \$100,000 effective July 1, 2014. The District retains \$200,000 per occurrence for automobile and general liability exposures. The District retains \$100,000 per occurrence for property damage other than named storms (hurricanes, etc.); for named storms the District's retention is 5 percent of the total insured value per building.

During the 2013-2014 fiscal year, health and hospitalization coverage are being provided through purchased commercial insurance with minimum deductibles for each line of coverage, except for prescriptions. Coverage for prescription drugs is provided through a self-insurance program administered by an outside provider.

The District reports the self-insurance programs in the Internal Service Funds. Amounts are transferred from the General Fund to the Internal Service Funds to provide sufficient resources to cover claims incurred, pay for the purchase of excess insurance, pay for risk management personnel expenses and pay the insurance service agent's administrative fee.

Settled claims resulting from risks described above have not exceeded commercial insurance coverage for the past three fiscal years. No excess insurance coverage has been purchased for the prescription drug self-insurance program.

On June 24, 2014, the Board authorized a transfer of \$7.5 million from the General Fund to the Self-Insurance - Prescription Internal Service Fund in anticipation of the District becoming self-insured for all aspects of health and hospitalization coverage for the calendar year 2015. To be consistent with this transfer, the fund is now called the Self-Insurance - Health Fund, and all future health and prescription self-insurance activities will be accounted for in this fund.

H. Risk Management (continued)

A liability in the amount of \$8,954,508 was actuarially determined to cover outstanding claims and estimated incurred, but not reported, insurance claims payable for the Self-Insurance - Casualty, Liability, and Workers' Compensation Fund, at June 30, 2014, and is net of \$130,000 of excess insurance recoverable on unpaid claims. In addition, a claim in the amount of \$146,439 has been incurred above the actuarially determined claims liability amount. A liability in the amount of \$616,721 was actuarially determined to cover outstanding claims and estimated incurred, but not reported, insurance claims payable at June 30, 2014, for the Self-Insurance - Health Fund. The estimate of the insurance claims payable also includes an allocated loss adjustment expense (incremental claims adjustment expenses). Allocated loss adjustment expense provides for all expenses associated with the handling and settling of claims that can be directly attributable to a particular claim. Such expenses typically include legal fees, investigatory expenses, expert witness fees, etc. No other costs associated with the District's insurance program have been considered in determining the insurance claims payable.

The following schedules represent the changes in claims liability for the past two fiscal years for the District's Self-Insurance Programs:

Casualty, Liability, and Workers' Compensation Self-Insurance Fund:

Fiscal Year	Balance at Fiscal Year Beginning	Current Year Claims and Changes in Estimates	Current Year Claim Payments	Balance at Fiscal Year End

Total bonds payable	\$ 17,505,000	\$ 12,340,000		

The various issues of State School Bonds were issued to finance capital outlay projects of the District or refund previously issued State School Bonds. These bonds are issued by the State Board of Education on behalf of the District. The bonds mature serially, and are secured by a pledge of the District's portion of the State assessed motor vehicle license tax. The State's full faith and credit is also pledged as security for these bonds. Principal and interest payments, investment of Debt Service fund resources, and compliance with reserve requirements are administered by the State Board of Education and the State Board of Administration.

3. Defeased Debt and Refunding

The Florida Department of Education issued State Board of Education (SBE), Capital Outlay Bonds, Series 2014A, on May 22, 2014 for \$24,555,000. A portion of the proceeds were used to refund \$13,735,000 of the SBE, Capital Outlay Bonds, Series 2004A on May 23, 2014. A separate amount of \$13,735,000 has been placed in a trust account to advance refund the SBE, Capital Outlay Bonds, Series 2005A bonds. The District's portion of Series 2014A bonds totaled \$925,000 and was used to refund \$330,000 of the District's portion of Series 2004A bonds on May 23, 2014 and advance refund \$700,000 of Series 2005A bonds. The District's pro rata share of the net proceeds of the Series 2014A bonds was \$1,063,350 (including a premium at issuance of \$144,762 and after deduction of \$6,412 by the SBE for the District's pro rata share of underwriting fees, insurance, and other issuance cost). The District's pro rata share of the current refunding of the 2004A bonds totaled \$336,195. The remaining proceeds of \$727,155 have been placed in a trust account to refund the Series 2005A bonds that matures on or after January 1, 2016, and is scheduled to be called on January 1, 2015. The Series 2005A debt is not considered legally defeased and the trust account is not considered to be risk-free in accordance with GASB Statement No. 7. As a result, the refunding of \$700,000 representing the District's portion of Series 2005A bonds has not been removed from the government-wide financial statements. When the Series 2005A bonds are called on January 1, 2015, they will be removed.

The Series 2014A bonds were issued to reduce the total debt service over the next 11 years by approximately \$3,249,876 and to obtain an economic gain (difference between the present value of the debt service payment on the old and new debt) of \$2,916,293. The District's portion resulted in a reduction in total debt service of \$118,726 over the next 11 years and \$106,592 in economic gain.

I. Long-Term Liabilities (continued)

3. Defeased Debt and Refunding (continued)

On September 13, 2012, proceeds of Series 2012B, Refunding Certificates of Participation, were placed into an irrevocable trust to provide for the principal and interest payments on the Series 2004A certificates maturing after July 1, 2014, and to call all outstanding certificates maturing after July 1, 2014, on July 1, 2014. As a result, \$28,755,000 of the 2004A series certificates are considered to be in-substance defeased and the liability for these bonds has been removed from the government-wide financial statements. The Series 2004A certificates, maturing after July 1, 2014, were called on July 1, 2014.

4. Forward Delivery Agreement

On January 17, 2014, the Board entered into a Forward Delivery Agreement. This agreement requires the District to issue \$12,810,000 in Series 2015A, Certificates of Participation, on April 2, 2015, at an interest rate of 2.77 percent. The proceeds from the sale of the Series 2015A certificates, totaling \$12,967,000, will be used, on July 1, 2015, to call \$12,560,000 of Series 2005A, Certificates of Participation that mature after July 1, 2015.

IV. Summary Disclosure of Significant Contingencies

A. Litigation

The School Board is a defendant in various lawsuits at fiscal year-end. Although the outcome of these lawsuits is not presently determinable, in the opinion of the District's legal counsel, the resolution of these matters will not have a material adverse effect on the financial position of the District.

B. Other Loss Contingencies

The District received financial assistance from Federal and State agencies in the form of grants and appropriations. The disbursement of funds received under these programs generally requires compliance with specified terms and conditions and is subject to final determination by the applicable Federal and State agencies. Any disallowed claims should become a liability of the General Fund or other applicable funds. The amount of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although District management anticipates such amounts, if any, will be immaterial.

V. Subsequent Event

On November 19, 2014, the District issued Certificates of Participation, Refunding Series 2014A, in the amount of \$20,455,000. The Certificates of Participation, Refunding Series 2014A, are being issued to refund the outstanding Certificates of Participation, Series 2006A.

The General Fund budgetary comparison statement presented within the basic financial statements was presented at a summary level that is higher than which the District has budgetary control. Therefore, a more detailed budgetary comparison schedule is provided as part of the other supplementary schedules to demonstrate the District's compliance with its legal level of budgetary control (i.e., the object level within each function) for the General Fund.

The General Fund is the primary operating fund of the District. All general tax revenues and other receipts that are not allocated by law or contractual agreement to another fund are accounted for in the General Fund. The General Fund is reported as a major governmental fund.

Other Supplementary Schedules Governmental Funds other than General Fund

Combining Statements

Included in the other supplementary schedules are combining statements for nonmajor governmental funds. These statements provide information on each individual nonmajor governmental fund that aggregates to the total presented as nonmajor governmental funds on the basic financial statements.

Individual Budgetary Comparison Schedules

Also included in the other supplementary schedules are budgetary comparison schedules for all governmental funds.

For major special revenue funds, because the budgetary comparison statement presented within the basic financial statements was presented at a summary level that is higher than which the District has budgetary control, a more detailed budgetary comparison schedule is provided as part of the other supplementary schedules. This schedule demonstrates the District's compliance with its legal level of budgetary control for the major special revenue funds.

For nonmajor special revenue funds, all debt service funds, and all capital projects funds, budgetary comparison statements were not presented as part of the basic financial statements. Budgetary comparison schedules are presented as part of the other supplementary schedule for each of these funds to demonstrate the District's compliance with its budget in each fund.

Nonmajor Governmental Funds

Special Revenue Funds

The Special Revenue Funds account for certain revenues derived from the State of Florida, the Federal Government and other local and private sources that are required to finance designated activities.

Contract Programs Fund – To account for and report on activities of various programs and grants received from various Federal, State and other funding sources according to the specifications and requirements of each funding source.

Food Service Fund – To account for and report on activities of the food service program in serving breakfast and lunch at the schools.

Debt Service Funds

The Debt Service Funds are used to account for the payment of interest and principal of the current portion on long-term debt.

State Board of Education (SBE) Bond Fund – To account for and report on payment of principal, interest, and related costs on the state school bonds issued by the State Board of Education on behalf of the District. These bonds are payable from the District's portion of the state-assessed motor vehicle license tax.

Capital Projects Funds

The Capital Projects Funds are used to account for the financing and acquisition or construction of major capital facilities, such as new school buildings or additions to existing buildings, or for major renovation projects.

Capital Outlay & Debt Service Fund – To account for and report on the dollars received through the State's Capital Outlay & Debt Service (CO&DS) program, used for construction and maintenance of schools.

Other Capital Improvement Fund – To account for and report on funds received from various sources designated for construction and maintenance of schools.

Internal Service Funds

Internal Service Funds are nonmajor proprietary funds and are reported as governmental activities. They are used to account for the financing of goods or services provided by one department to other departments within the school district on a cost reimbursement basis. The following funds are included in the Internal Service Funds:

Self-Insurance – Casualty, Liability, etc. – To account for the financial activities of the District's self-insured property, casualty, liability, and workers' compensation program.

Self-Insurance – Health – To account for the financial activities of the District's self-insured employee prescription and future medical insurance program.

Print Shop – To account for the financial activities of the District's print center operations.

Computer Store – To account for the financial activities of the District's centralized computer purchase, preparation and software installation program.

Nonmajor Discretely Presented Component Units

The component units columns in the basic financial statements include the financial data of the District's nonmajor discretely presented component units.

Choices in Learning, Inc., Galileo School for Gifted Learning and UCP Seminole Charter School (Charter Schools) are separate not-for-profit corporations organized pursuant to Chapter 617, Florida Statutes, the Florida Not-For-Profit Corporation Act, and Section 1002.33, Florida Statutes. The Charter Schools operate under a charter approved by their sponsor, the District School Board of Seminole County. In accordance with a ruling by and requirement of the Florida Department of Education, the charter schools are included as component units of the District. According to the Florida Department of Education, the charter schools are fiscally dependent on the District for their tax levy and the majority of their budget and create a financial burden on the District because the charter schools' full-time equivalent (FTE) student enrollment is the basis for the District to provide funding to the charter schools.

The Foundation for Seminole County Public Schools, Inc. (Foundation) is a not-for-profit corporation organized and operated as a direct-support organization under Section 1001.453, Florida Statutes, to raise funds; receive, hold, invest, and administer property; and to make expenditures for the benefit of the District. Section 1001.453, Florida Statutes, requires the Foundation to be authorized and approved by the District. Because of the nature and significance of its relationship with the District, the Foundation is considered a component unit. The Foundation has its own staff and does not provide services entirely or nearly entirely to the District, and therefore is discretely presented, rather than blended.

Notes:

- (1) During the fiscal year ending June 30, 2006, two new function/program expenditures classifications were established to report technology expenditures previously reported in central services.
- (2) In fiscal years prior to June 30, 2014, class size reduction funding was presented as an operating contribution to instruction. Pursuant to State Statute, this amount is not restricted to this function, and has been restated to be reported as other state sources general revenues for all periods presented.
- (3) During the fiscal year ended June 30, 2014, a restatement of net position for governmental activities was reported due to changes in accounting principles and prior period adjustments. Periods prior to June 30, 2014 have not been adjusted for these changes.
- (4) During the fiscal year ended June 30, 2013, GASB Statement Nos. 63 and 65 were implemented, resulting in adjustments to beginning net position. Periods previous to that fiscal year have not been adjusted for these changes.

Notes:

- (1) Net of allowable discounts
- (2) Property Taxes become due and payable on November 1 of each year. A four percent discount is allowed if taxes are paid in November, with the discounts declining by one percent each month thereafter. Accordingly, taxes collected will never be one hundred percent of the tax levy. Taxes become delinquent on April 1 of each year and tax certificates for the full amount of any unpaid taxes and assessments must be sold not later than June 1 of each year. Accordingly, majority of taxes are collected in the fiscal year levied, as current year tax certificates are included in current tax collections.

Note:

(1) Overlapping debt is that of local governments and Seminole County which apply to property owners within the County. Not all overlapping debt applies to all county property owners. The municipality rates apply only to the property owners in each of the county's seven cities. This estimates the portion of the outstanding debt of those overlapping governments that is borne by the residents of the county. This process recognizes that, when considering the county's ability to issue and repay long-term debt, the entire debt burden borne by the residents and businesses should be taken into account. However, this does not imply that every taxpayer is a resident and therefore responsible for repaying the debt, of each overlapping government. The municipalities listed above are 100% within the boundary of the Seminole County and the School District.

- (1) Population, Personal Income and Per Capita Personal Income were obtained from the United States Department of Commerce, Bureau of Economic Analysis for the 2004-05 through 2012-13 fiscal years. Population was obtained from the United States Census Bureau for the 2013-14 fiscal year. Personal Income and Per Capita Personal Income for the 2013-14 fiscal year was estimated based on the 2012-13 fiscal year and the Statewide growth rate projected by the State of Florida Office of Economic & Demographic Research. Due to use of a single and more consistent source, Personal Income and Per Capita Personal Income has been restated for all prior fiscal years. Population has been restated for the 2010-11, 2011-12 and 2012-13 fiscal years for the same reason.
- (2) Unemployment Rates are the average monthly rate for the fiscal year and were obtained from the Florida Research and Economic Information Database. Due to use of a single and more consistent source, Personal Income and Per Capita Personal Income has been restated for all prior fiscal years.

Notes:

- (1) For the 2009-10 and 2010-11 fiscal years, American Recovery and Reinvestment Act funds were included on this schedule; however, the funds were reported in a separate Special Revenue fund. These funds were used to replace State FEFP funds and other revenues from the State usually accounted for in the General Fund.
- (2) The method of calculating Full-Time Equivalent (FTE) enrollment changed in the 2013-14 fiscal year to establish a maximum of one FTE and to prorate student enrollment in excess of one FTE between the school district, community college, and virtual school attendance.

DISTRICT SCHOOL BOARD OF SEMINOLE COUNTY, FLORIDA
Notes to the Schedule of Expenditures of Federal Awards
For the Year Ended June 30, 2014

1. Summary of Significant Accounting Policies

Basis of Presentation

The Schedule of Expenditures of Federal Awards represents amounts expended from Federal programs during the 2013-14 fiscal year as determined based on the modified accrual basis of accounting. The amounts reported on the Schedule have been reconciled to and are in material agreement with amounts recorded in the District's accounting records from which the basic financial statements have been reported.

Grant Contingency

The grant revenues amounts received are subject to audit and adjustments. If any expenditures are disallowed by the grantor agencies as a result of such an audit, any claim for reimbursement to the grantor agencies would become a liability of the District. In the opinion of management, all grant expenditures are in compliance with the terms of the grant agreement and applicable federal and state laws and regulations.

2. Noncash Assistance - National School Lunch Program

Included in the amount reported for National School Lunch Program was \$1,004,525 of donated food received during the 2013-14 fiscal year. Donated food is valued at fair value as determined at the time of donation.

3. CFDA Totals

- (a) Total expenditures for CFDA 84.027 were \$ 18,374,797.
- (b) Total expenditures for CFDA 84.395 were \$ 3,140,102.

4. Direct Award Grant Numbers

- (a) The DOD, NDEP, DOTC-STEM Education Outreach Implementation grants awarded directly from the United States Department of Defense are provided under agreement numbers N61340-12-2-0002 and N61340-14-2-0001.
- (b) The Magnet Schools Assistance grant awarded directly from the United States Department of Education is provided under agreement number U165A130023.
- (c) The Retired and Senior Volunteer Program grant awarded directly from the Corporation for National and Community Service is provided under agreement number 12SRSFL018.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF THE FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Report on the Financial Statements

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the Seminole County District School Board, as of and for the fiscal year ended June 30, 2014, and the related notes to the financial statements, which collectively comprise the District's basic financial statements, and have issued our report thereon dated December 17, 2014, included under the heading **INDEPENDENT AUDITOR'S REPORT**. Our report includes a reference to other auditors who audited the financial statements of the school internal funds and the aggregate discretely presented component units, as described in our report on the District's financial statements. This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control such that there is a

reasonable possibility that a material misstatement of the District's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, rules, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to District management in our operational audit report No. 2015-064.

Purpose of this Report

The purpose of the **INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF THE FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*** is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this report is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM AND REPORT ON INTERNAL CONTROL OVER COMPLIANCE

Report on Compliance for Each Major Federal Program

We have audited the Seminole County District School Board's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the District's major Federal programs for the fiscal year ended June 30, 2014. The District's major Federal programs are identified in the **SUMMARY OF AUDITOR'S RESULTS** section of the accompanying **SCHEDULE OF FINDINGS AND QUESTIONED COSTS**.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its Federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the District's major Federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major Federal program occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major Federal program. However, our audit does not provide a legal determination of the District's compliance.

Opinion on Each Major Federal Program

In our opinion, the District complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major Federal programs for the fiscal year ended June 30, 2014.

Report on Internal Control Over Compliance

District management is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the District's internal control over compliance with the types of requirements that could have a direct and material effect on each major Federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major Federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the District's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a Federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a Federal program will not be prevented, or detected and corrected on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance with a type of compliance requirement of a Federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Purpose of this Report

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.
