

## ESE Services

Exceptional Student Education (ESE) Services are provided to students who have an Individual Education Plan (IEP) based on the requirements of the Individuals with Disabilities Education Act. The ESE Services Division supports students throughout all of Seminole County to provide supplementary aids and services to students to ensure a free and appropriate public education in the least restrictive environment. These needs are determined by each individual student's IEP team and the district-based staff within this division provide students and schools with direct/in-direct services, monitoring, training, and support to families of students with disabilities.
