

Intervention Services provide supportive and preventative services to ANY student who demonstrates a need in order to foster success. This can include intervention in the area of academics, behavior, attendance, social/emotional learning, health, or basic needs to support access to education.

If your student is struggling, please reach out to your school's certified school counselor and school administrator to set up a meeting to discuss your concerns. The school team will reach out to Intervention Services to involve our team if the school needs additional resources to assist your student.

If you need further assistance or support, you can reach the Intervention Services office at 407-320-2011.
